RESOURCES:

	David P. Doane and Lori E. Seward "Applied Statistics in Business and Economics" (recommended)
	A FOLDER TO KEEP notes, assignments, and other handouts
	USB flash drive
	<u>YOU ARE REQUIRED TO CHECK YOUR EMAIL DAILY</u>

Description of the Course

The fundamental purpose of this course is to enable students to understand the basic statistical concepts and techniques, and how they can be applied in the field of business by modern managers. The course aims to build students' statistical background and to give them the statistical skills necessary to meet the needs of industry and real-world decision-making problems. Emphasis will be on statistical reasoning, problem-solving, computer applications, and interpretation of results.

Learning Objectives:

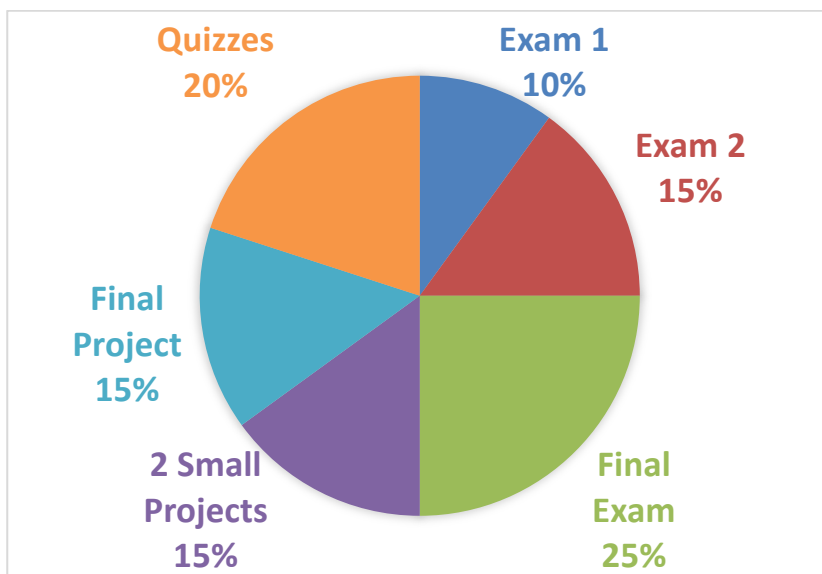

The goals for this course are for you to be able to:

1. Gather, clean, describe, and summarize data using Excel
2. Take samples and estimate unknown parameters
3. Formulate and test hypotheses
4. Understand basic principles of statistical process control
5. Use multiple regression to analyze data
6. Successfully complete research projects
7. Design and conduct research in the future
8. Use sound quantitative reasoning to analyze business problems.

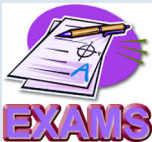

ASSIGNMENTS

GRADING

A	93-100%	930-1000
A-	90-92%	900-929
B+	87-89%	870-899
B	83-86%	830-869
B-	80-82%	800-829
C+	77-79%	770-799
C	73-76%	730-769
C-	70-72%	700-729
D+	67-69%	670-699
D	64-66%	640-669
D-	60-63%	600-639
F	< 60%	< 599

Assignments ALL ASSIGNMENTS ARE INDIVIDUAL!

	Exams Value: 500p. (50%) Exam dates are listed. Students are required to take all exams at the scheduled times. The only exceptions are for university-sanctioned excuses (class conflict, medical or family emergency) with documentation. Students must contact me at least a week before missing an exam or will receive no credit for the exam. (Note that work or being out of town are not considered excuses.) If your reason is compelling, I will schedule a make-up date or re-weight your other exams. If you have a conflict with sports or other events – let me know ASAP (and no later than a week before the exam date)!!!
	Projects Value: 3 Projects: Project 1 and 2 (75p. each); Final Project (150p.) (30%) There will be three projects. Written reports are due on the date indicated and late work is NOT accepted!!! You are expected to work on projects individually and your work will be checked for plagiarism. The project submission includes work files (Word and Excel) and a quiz. If your work files are missing or contain incorrect work, your project's quiz grade will be reduced or set to zero.
	Quizzes Value: 200p. (20%) There will be weekly or bi-weekly quizzes and Excel assignments. There are no makeup quizzes, but one lowest quiz score will be dropped when final grades are calculated. THIS IS YOUR OWN INDIVIDUAL WORK! Your work will be checked for plagiarism. You will submit your Excel assignments to Canvas>Assignments and a quiz will open condition on your assignment submission. It is your responsibility to make sure that you successfully submitted your work for grading. Some of the work may not be graded. Please, do NOT e-mail me your work – it will be counted as not submitted. We use Canvas to submit files. If your work files are missing or contain incorrect work, your quiz grade will be reduced or set to zero

MSU strives to create a culture of support and recognizes that your mental health and wellness are equally as important as your physical health. We want you to know that it's OK if you experience difficulty, and there are several resources on campus to assist you succeed emotionally, personally, and academically:

Counseling & Psychological Services: montana.edu/counseling
Health Advancement: montana.edu/oha
Insight Program (Substance Use): montana.edu/oha/insight
Suicide Prevention: montana.edu/suicide-prevention
Medical Services: montana.edu/health/medical.html
Mental Health Screen: screening.mentalhealthscreening.org/montanastateuniv

Policies

Student Conduct Code

All students are expected to abide by the Student Conduct Code and Academic Integrity Guidelines available at https://www.montana.edu/policy/student_conduct/. Paraphrasing or quoting another's work without citing the source is a form of academic misconduct. Even inadvertent or unintentional misuse or appropriation of another's work (relying heavily on source material that is not expressly acknowledged) is considered plagiarism. If you have any questions about using and citing sources, please ask me for clarification.

ALL WORK IS INDIVIDUAL!

Although you are always encouraged to talk to others about assignments, the work you turn in must be your own and will be checked for plagiarism. All work in the class is INDIVIDUAL. DO NOT SHARE YOUR FILES OR ACCEPT FILES FROM OTHERS! If you share your files or cheat on quizzes, you will receive zero on this work or in class, and I will report you to the Dean and MSU. If you have any questions about this, please ask.

Accommodations for Disabilities

If you have a documented disability for which you are or may be requesting an accommodation(s), please let me know **as soon as possible**. Please also contact Disabled Student Services (DSS) at 994-2824. You can find additional information about accommodations provided through DSS at www.montana.edu/disabilityservices/.

All MSU students are required to have email for official correspondence, including course information. Such correspondence will be sent to your official university email account. Please set your spam filter so that it permits emails from the course listserv and check your email daily.

I am here to HELP you learn, but YOU are ultimately responsible for your performance!

Course Materials Copyright

This syllabus, course lectures and presentations, and any course materials provided throughout this term are protected by U.S. copyright laws. Students enrolled in the course may use them for their own research and educational purposes. However, reproducing, selling, or otherwise distributing these materials without the written permission of the copyright owner is expressly prohibited, including providing materials to commercial platforms such as Chegg or CourseHero. Doing so may constitute a violation of U.S. copyright law as well as MSU's Code of Student Conduct.

Electronic video and/or audio recording is not permitted during class unless the student obtains permission from the instructor. If permission is granted, any distribution of the recording is prohibited. Students with specific electronic recording accommodations authorized by the Office of Disability Services do not require instructor permission; however, the instructor must be notified of any such accommodation prior to recording. Any distribution of such recordings is prohibited.

Core Perspective: Inquiry Social Sciences (IS): emphasizes methods and principles used by social scientists to systematically study human behavior. We focus on estimation, hypothesis testing, and regression.

University Inquiry Social Science (IS) Core: This class meets the University IS requirements for the Core Curriculum that provides opportunities for developing two Core Qualities:

1) **Thinker and Problem Solver.** As a thinker and problem solver, you will reason using relevant evidence gathered through quantitative methods. You will apply information literacy: the ability to skillfully consume (i.e., find, evaluate, and use) and meaningfully create

information. You will demonstrate thoughtful evaluation of the data and provide an interpretation based on the data: define problems, find evidence, conduct analysis, and identify solutions.

2) **Effective Communicator.** As an effective communicator, you will use written and visual communication to create meaning and foster understanding. You will demonstrate facility in analyzing, interpreting, and understanding quantitative information. You will be given large datasets and tasked with developing approaches to asking and answering questions, defining problems, and identifying solutions. You will then use written and visual communication to persuade and inform sound business decision-making.

E-Mail Etiquette

- Include a salutation and sign-off (e.g., *Professor, Hi; Thank you, Best wishes*).
- Single-space within paragraphs and double-space between paragraphs.
- Write in complete sentences, and use upper and lowercase letters.
- Include a signature block (**full name, course number and section number or time!**)
- **Use a detailed subject line.**
- Be concise. Present your point in the 1st sentence! Ask politely!
- Do NOT ask for things you can find out by yourself (e.g., office hours are always listed on the syllabus; ask classmates for notes from missing lectures)
- Never respond when you are angry.
- Care about correctness – **use spell-check!**
- Resist humor and tongue-in-cheek comments.
- Assume that all business e-mail is monitored.

WARNING: E-mails that do not follow the above standards will NOT be answered!!!

Tentative Class Schedule Spring 2026: I will keep you updated via EMAIL

Jan 20 *Last day to self-add courses online*
 Jan 27 *Last day to self-drop courses online and add via instructor*
 Feb 3 *Last day to drop a class via advisor without a "W" grade with approval*
 April 15 *Final day to drop with a "W" grade*

Date			Topic	
			Week 1	Quizzes
Jan	13	T	Introduction; Syllabus; Data Sources; Bias; Sample vs. Population; Histogram and Pareto Graphs (Chapters 2,3,4)	
	15	R	Describing Data: Data Types (Chapters 2,3,4)	Jan 19

			BMGT 240 Week 2	Quizzes
	20	T	Go over Bike Data; Central Tendency (CT) (Chapters 2,3,4)	
	22	R	Dispersion; Outliers; Confidence Intervals (CI) (Chapter 8)	Jan 25
			Week 3	
	27	T	Practice & Applications - Bike Data Example, Start working on Inc5000	
	29	R	Practice & Applications - Work on Inc5000	Feb 1
			Week 4	
Feb	3	T	Practice & Applications - Work on IPO	Feb 4
	5	R	Practice & Applications - Work on Project 1	
			Week 5	
	10	T	Work on Project 1	
	11	W	5:00 pm Jabs Career Symposium	
	12	R	Project 1 submission Quiz	Feb 13
			Week 6	
	17	T	EXAM #1 IN CLASS	Exam
	19	R	Hypothesis Testing (Chapters 9, 10)	Feb 22
			Week 7	
	24	T	Hypothesis Testing (Chapters 9, 10)	
	26	R	Hypothesis Testing: Practice & Applications	
			Week 8	
Mar	3	T	Hypothesis Testing: Practice & Applications	March 3
	5	R	ANOVA: one factor (Chapter 11)	
			Week 9	
	10	T	ANOVA: two factors without and with replication	March 10
	12	R	T-test and ANOVA application – data formatting	
			Week 10	
	17	T	SPRING BREAK – HAVE FUN!	
	19	R	SPRING BREAK – HAVE FUN!	
			Week 11	
	24	T	Work on Project 2	
	26	R	Project 2 submission Quiz	March 27
			Week 12	
	31	T	EXAM #2 IN CLASS	Exam
Apr	2	R	Correlation and Regression (Chapters 12, 13)	
			Week 13	
	7	T	Regression practice: Bus Data	April 7
	9	R	Regression practice and DATA COLLECTION (DUE April 10)	April 10
			Week 14	
	14	T	Regression practice	April 14
	16	R	Work on Final Project	
			Week 15	
	21	T	Work on Final Project	
	23	R	Work on Final Project	
			Week 16	
	28	T	Final Project submission / Quiz	April 28
	30	R	EXAM IN CLASS	Exam
May	5	T	Exam Meeting TBD
